

Job Title: Asset Manager

Reports to: Head of Services

Company Overview:

PivotGen focuses on repowering wind farms utilizing tailor-made strategies developed for each project. We are led by a management team with over 50 years of experience in renewables. Partnering with ACEN Renewables, based in the Philippines, which is an international, publicly-traded renewable energy company with ~4,000MW installed capacity across Asia Pacific; and UPC Renewables, a global developer and operator with over 5,000MW of operating wind and solar projects, we provide solutions utilizing state-of-the-art hardware and software in order to achieve long-term efficiency and reliability. With this approach, PivotGen extends project life, increases annual energy production, and reduces the project's levelized cost of energy.

Job Summary:

Reporting to Head of Services, the Asset Manager will manage the operating wind assets owned by the company.

Key Responsibilities:

P&L Management

- Develop and negotiate third-party agreements, WTG O&M, BOP Services, Major Component Exchange (MCE) programs, etc.
- Assist in warranty claims and negotiations on projects' behalf
- Perform return on investment (ROI) NPV analysis on investments to the project
- Assist with annual project budgets and update monthly accrual and cash forecasts and financial models as required

Compliance & Reporting

- Prepare operational reports related to the performance of the assets as required for stakeholders (both internal and external)
- Investigate and remedy any variances to budget
- Oversee and ensure compliance with contractual requirements in all project agreements
- Obtain stakeholder consent as per project agreements (landowner, offtaker, local authorities, etc.)
- Ensure proper notifications are made as per project agreements (landowner, offtaker, local authorities, etc.)
- Maintain a schedule of regulatory requirements and reporting and ensure compliance
- Understand requirements & manage all project agreements, including Power Purchase Agreements, Interconnect Agreements, etc.

Cross-Functional Engagement

- Interface with business development, finance, and project execution teams to ensure smooth transition of projects into commercial operation
- Collaborate with the engineering and O&M team to evaluate and improve operational performance of the assets

- Review proposed pro-forma financial models and provide input
- Coordinate with O&M on the daily operations of the assets, including major component repair and replacement
- Coordinate with the energy marketing team to execute any power & REC sale agreements and advise the team on any opportunities for revenue optimization
- Other duties as assigned

Minimum Requirements:

- Bachelor's degree in a quantitative discipline (e.g., Engineering, Mathematics, Economics) that includes coursework in accounting or finance
- 2 - 4 years of asset management experience
- 7-10 years of experience in the energy/utilities sector
- Experience in renewable energy (wind) is preferred, but not required
- Applicants for this position must be authorized to work in the United States. The Company is unable and has no obligation to sponsor or assume the sponsorship of any applicant's employment visa

Additional Knowledge, Skills, and Abilities:

- Ability to exercise high ethical standards and sound judgment
- Self-starter
- Ability to work collaboratively in a remote/hybrid setting
- Strong written and oral communication skills
- Strong analytical, logical, and problem-solving skills
- Proficient in MS Office suite specifically Excel
- Some travel required

How to Apply:

If you are interested in this opportunity, please submit your cover letter and resume or CV to HR@pivotgen.com. We thank all applicants for their interest, however, only those selected for an interview will be contacted.
